

Checkweigher MK-CW-01-0.1K

This system is widely used in Pharmaceutical production lines for highest weighing accuracy and repeatability.

The Checkweigher monitor manufacturing efficiencies and provide real-time data on your process, product completeness and trends also provide feedback data to production line.

It is also used for checked for completeness of secondary package to identify any missing item.

Multi industry application

Speciality

A million product formula storage—Users/Admin can easy add or delete data.

Standar Specification

Model	MK-CW-01-0.1K
Scale Divison	0.05g
Weighing range	5~100g
Accuracy	±0.2g
Weighing speed	180 pcs/min
Belt speed	5~90meter/min
Platform size	275×133mm
Height	830±50mm
Belt size	250×150mm
Belt material	PU (White)
Belt thickness	0.7mm
Tested object size	50~180×20~80×10~150mm
Display size	10 inch
Alarm light	3-color signal light
Alarm horn	optional
Holder/Frame material	304 stainless steel
Weigher platform material	304 stainless steel
Data storage	100 sets of parameters and 1 million weighing results
Communication	RS485 (Modbus RTU)/Modbus TCP/IP
Rejection mechanism	swing~arm type, air blowing type (optional)
Segments	3 levels
Air pressure	0.4~0.6 Mpa
IP grade	IP54
