

MK - E83D

Features

- Instrument size:
 - > 220x105x50mm handheld size with LCD display
 - > Portable
 - > Wireless double-sided communication (can tare, zero, calibration and parameter setting)
 - > 5 digits LCD display with backlight
 - > Digit height: 25mm
 - > Many function on instrument keyboard
 - > Such as tare, zero, peak, filter setting, gravity regulation
- Calibration:
 - > Keyboard calibration and parameter setting
 - > Simple operation
- Battery:
 - > 4pcs AA size alkaline batteries
 - > 50 hours radio continuous using
- Set-point:
 - > One user programmable Set-Point can be used for safety and warning applications or for limit weighing
- RS-232 communication:
 - > Print or exact data easily
 - > Continuous output can drive a scoreboard
- Operating temperature: -20°C to 60°C
- Antenna: Integral antenna
- Update rate from loadcell: 12 times per second
- Radio frequency:
 - > Standard 2.4GHz wireless module
 - > Up to 70m wireless distance
 - > Up to 128 channels available (433MHz, 868MHz wireless module optional)
